PROFILE

I'm Petr, front-end dev with a special spot for web3 and crypto. My self-taught journey has led me to Mars, where I blend creativity with code every day. Besides coding, I'm all about staying active - whether it's Muay Thai, catching waves, or diving. I value teamwork and clear communication.

EXPERIENCE

FRONT END DEVELOPER

Mars Protocol (intern) 07/2024 - 09/2024

- Core Platform Support: Assisted with bug resolution and feature development for the main Web3 trading platform, contributing to application stability and user experience.
- Assisted with design for leaderboard and perpetual trading dashboard
- Technical Learning: Developed responsive front-end solutions integrating real-time data, complex visualizations, and Web3 functionalities while learning industry best practices and code quality standards.

FRONT END DEVELOPER

Timecloud - 10/2023 - 05/2024

- Feature Development: Worked on innovative features, leading to a 35% user base increase.
- Team Integration: Seamlessly collaborated with a dynamic team of six developers, ensuring integrated, cohesive development efforts that led to a 20% reduction in reported bugs.
- Testing & Quality Assurance: Conducted end-to-end and component testing.
- Code Review & Best Practices: Participated in code reviews to maintain high code quality and adherence to best practices in a dynamic environment.

FREELANCE WEB DEVELOPER

Self-Employed 11/2022 - 10/2023

- Provided comprehensive end-to-end web development services for small businesses in New Zealand, overseeing client communication, project design, and full implementation using HTML, CSS, and JavaScript.
- Independently managed all aspects of website creation, from initial consultations and custom design to development and deployment, ensuring responsive, functional sites tailored to client goals.
- Enhanced client satisfaction and project success by handling every stage of the process, refining communication, time management, and problem-solving skills
